Summary

Software Engineering undergraduate with DevOps/SRE internship experience at WSO2 and hands-on work in Kubernetes, Terraform, and cloud infrastructure.

Work Experience

WSO2 LLC

DevOps / Site Reliability Engineering Intern
Colombo, Sri Lanka | Sep. 2025 - Feb. 2026

- Contributed to incident and alert notification workflows integrating Azure, AWS, Site24x7, and Prometheus.
- Led the migration from PagerDuty to ServiceNow native capabilities, implementing custom features for team requirements.
- Automated service incident creation and optimized alerting workflows for on-call engineers.

Education

Sri Lanka Institute of Information Technology (SLIIT)

BSc (Hons) in Information Technology (Specializing in Software Engineering)
Sri Lanka | Nov. 2022 – Nov. 2026 (Expected)
Current GPA: 3.51

Projects

KinD-Cluster-Terraform

Automated Local Kubernetes Infrastructure
Personal Project | Aug. 2025 - Present

- Built modular Terraform configuration to provision local Kubernetes (KinD) clusters using Docker.
- Integrated cloud-provider-kind for native Ingress and LoadBalancer support.

SRE Homelab & Learning Projects

Infrastructure as Code & Lab Environments
Personal Projects | Ongoing

- Kubernetes Homelab: deployed multi-node clusters with custom networking and storage.
- Ansible Automation: developed reusable roles for server hardening and infrastructure provisioning.

Skills

DevOps & Cloud: AWS, Docker, Kubernetes, Terraform, Ansible, GitHub Actions, Linux, Bash

Backend & Data: Go, Node.js, REST API, gRPC, PostgreSQL, MySQL, Redis, RabbitMQ

Courses and Certifications

CKA Exam Preparation Course | KodeKloud | 2025

Ansible Advanced Course | KodeKloud | 2025
